# LOWER SHAW POND

T3 R4 BKP WKR, Somerset County  
U.S.G.S King & Bartlett Lake, Maine (7½')

## Fishes

Yellow perch  
Chain pickerel

Minnnows  
White sucker

## Physical Characteristics

Area - 64 acres

Maximum depth - 14 feet

Principal fishery: Chain pickerel

Temperatures:

Surface - 78°F

12 feet - 69°F

Lower Shaw Pond is located north of Flagstaff Lake. A short inlet enters the west side of the pond from nearby Shaw Pond. Its outlet flows southeast into the Halfway Brook near the Dead River. The pond's shoreline is undeveloped.

Water quality in Lower Shaw Pond is poor for coldwater gamefish. Water temperatures reach critically high level during the warm summer months. Salmonid spawning habitat is not present around the pond. Chain pickerel provide the only fishery. The pond is not stocked.

Lower Shaw Pond is accessible via logging roads from around either the east or west side of Flagstaff Lake. The pond is open to fishing under general law in both the summer and winter seasons.

Surveyed - July, 1953
